

CLEANING & REJUVENATION SYSTEM™ "CRS™" USE ONLY AS DIRECTED

CRS™ case: 3 gallons of ready to use Safe Solution® CRS and 1 gallon of concentrated Clean Step™ Multipurpose Cleaner

1 gallon (4 litres) of Safe Solution® CRS™ covers approximately **500** square feet

YOU WILL NEED:

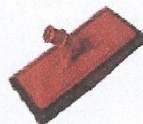

1 Wringer pail / 1 string mop / 1 or 2 doodlebug applicators with green pads / 1 medium bristle 18" push broom / rubber gloves.

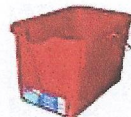

Wringer pail

String mop

Doodlebug holder

Stationary pail

Push broom

Important: We recommend that you wear rubber gloves during application process and use under well ventilated conditions.

BEFORE YOU BEGIN:

It is always advisable to test a small one square foot area first. Identify any sealers or waxes that may exist on the floor, which will need to be properly stripped prior to cleaning.

Fill wringer pail to full line with clean water and add 1 cup (250 ml) Clean Step™.

Clean up to maximum 100 sq. ft. sections at a time with minimum 2 people working.

CRS™ DIY APPLICATION INSTRUCTIONS

Step 1: Sweep up loose debris then liberally spray Safe Solution CRS, low to the surface, applying to a 100 sq. ft. section at a time. Now using doodlebug with green pad, scrub the surface for a few minutes until it appears clean.

Note: After scrubbing with CRS, place the doodlebug with pad into the stationary pail before you go to the next section. (DO NOT allow the doodlebug pad to contact or mix with Clean Step™)

Step 2: Using only the medium bristle push broom to scrub (string mop will also suffice), Mop out Clean Step™ directly onto the CRS solution over the 100 sq. ft. section you have just scrubbed, gently scrubbing the area for a few more minutes.

Step 3: Using wringer pail with clean water and mop, immediately pick up the two solutions and repeat above.

After completing all sections, a '**Thorough Hot Water Rinsing**' is now necessary (if there is no hot water available cold water will suffice). Completely hose off or pickup all residues until there is **NO RESIDUE** remaining.

CAUTION: Not for use on sealed marble or wood surfaces.

KEEP OUT OF REACH OF CHILDREN

FIRST AID TREATMENT: If splashed in eyes or skin flush thoroughly with water.
